Conference on Rabies
“The way toward rabies elimination”
10-11 December 2015
Geneva, Switzerland
The OIE drivers toward rabies elimination

- Strategic vision: dog-mediated rabies elimination by 2030
- Education on dog bite avoidance, treatment and post exposure prophylaxis
- Mass dog vaccination and stray dog population management as the foundation for rabies elimination
- Promote and support the OIE regional vaccine banks
- Support the development of national and regional elimination strategies
- Encourage the establishment of good veterinary governance to achieve and measure success
The Global Framework for the elimination of dog-mediated human rabies (STOP-R)

- Provides coordinated approach and vision for rabies elimination
- Harmonises actions and provide adaptable guidance for country and regional strategies
Dog-mediated rabies elimination is feasible
